### FABER CASTELL COMPRESSED CHARCOAL

All Pitt Monochrome products have in common the traditional consistent high standards of quality: light-fast colours and the special binding agent which ensures high pigment density. Produced from a fine mixture of soot and charcoal. Compressed charcoal comes in five grades from extra soft to extra hard. It leaves a dense black mark, ideal for heightening shadows and for clear delineation. Pitt charcoal offers the deepest possible black and a soft stroke. Especially suitable for large areas.

### DERWENT COMPRESSED CHARCOAL

Smooth, smudgy charcoal stick which lends itself perfectly to dramatic landscapes and portraiture. Reformulated from pure wood charcoal into a round, easy to use drawing tool, offering superb depth of colour and shade. Three rich tones - light, medium and dark - mix and blend beautifully while the addition of a little water will create subtle wash effects.
